

# “Oops, I Leaked It again” challenge

Two years ago, the VRT made a reportage in Ukraine and followed a section of the Ukrainian army, available here <https://www.vrt.be/vrtnws/nl/2022/05/08/bekijk-rudi-vranckx-aan-de-frontlijn-bij-charkov-waar-een-oma/>. At 01:33 in the video, they are filming the entrance of the HQ of the Ukrainian army. They blurred the image to make sure we couldn't locate the place. BUT, using OSINT, can you still identify the HQ location?

Our internal OSINT team already made some research and found out that the video starts at this location: 50.104564, 36.269475, based on the fact that they say they are moving north from Kharkivs'ka oblast, Ukraine. This finding can be demonstrated by comparing the picture of the video and Google Street View:

50.104564, 36.269475 on Google Street View

It is now up to you to continue the investigation and find the location of the HQ of the Ukrainian army depicted at 01:33. Your answer should be the coordinates of the Google Maps POI that serves as HQ (example of such coordinates: 50.84674383241941, 4.352398850553428).
